AB-SSD Announces New On-line Course

Human Papillomavirus (HPV): What every SLP needs to know

Description: The Human Papilloma Virus (HPV) is increasingly implicated as a cause of head and neck cancer and patients with this disease have unique demographics and expectations. As these patients are younger, healthier, and more likely to live a long life, functional outcomes and avoidance of long-term treatment related morbidity is of paramount importance. This presentation will include review of the unique profile of patients with HPV associated head and neck cancers and the epidemiology of HPV associated head and neck cancer national as well as globally.

Presenter

Heather Starmer, M.A., CCC-SLP, BCS-S
