

The **O** in H₂O stands for Opportunity.

A smart path to a secure future

- No college degree required — your student can start earning without taking on debt.
- Real benefits from day one — health insurance, retirement plans, and paid time off.
- Competitive pay — Water Operators earn \$18–\$25/hour right out of training.
- Jobs available now — positions are open locally and across the state.
- A career that grows — on-the-job training leads to advancement up the water industry ladder.
- Always in demand — water is essential, so Water Operators always have job security.

What does a Water Operator do?

Water Operators help keep drinking water safe by treating water, monitoring equipment, and keeping the plant running smoothly.

About SETH

SETH is free and approved by the Texas Commission on Environmental Quality (TCEQ) for certification. The online course covers 22 hours of instruction. TEA has approved SETH training as a stand-alone course or as part of other courses. Students who complete SETH training can take the Texas Commission on Environmental Quality test for a Class D Certified Operator's license. SETH gives students a future. More than 4,500 public water systems need certified operators, and once hired, there are plenty of opportunities for advancement.
