

The **O** in H₂O stands for Opportunity.

About SETH

The SETH Project is an initiative of Texas AWWA in cooperation with the Texas Education Agency (TEA), Texas Commission on Environmental Quality (TCEQ) and Texas A&M Engineering and Extension Service (TEEX).

It is supported by funding from the Texas Department of Agriculture (TDA), along with the Texas Section of the American Water Works Association (TAWWA).

How Can You Help?

Contact your local school system to encourage integrating SETH into the curriculum. Here are some tips:

- Contact the Career and Technology Education office.
- Tell them that SETH is free and approved by the Texas Commission on Environmental Quality (TCEQ) for certification.
- The online course covers 22 hours of instruction in easily managed classroom-period modules.
- TEA has approved SETH training as a stand-alone or included in other courses, such as Energy and Natural Resources Technology or Advanced Energy and Natural Resources,
- Point out that students who complete SETH training can take the Texas Commission on Environmental Quality test for a Class D Certified Operator's license.
- SETH gives students a future. More than 4,500 public water systems need certified operators and, once hired, there are plenty of opportunities for advancement.
