QUARRY CROSSING – LANDSCAPE COMPLETED PROJECT

The purpose of this renovation is to update the current landscape at the Quarry Crossing which is outdated. Also to remove any dead or aged plants, remove trees that are not healthy and tie both Alamo Quarry Market and Quarry Crossing together. The current plants will be converted to more drought tolerant plants which are adaptably and will thrive in our Texas climate.

The renovation will also update our current irrigation system which will allow us to conserve water, reduce our water bills and save on irrigation repairs.
