

TCEP Mentors Database

We are delighted to announce the TCEP Mentors Database. This database formalizes TCEP's strong history of nurturing its members to their full potentials and creating a culture of leadership and advocacy development. It is the foundation of EM Futures: Engaging Members, Developing Leaders, a suite of initiatives developed by TCEP since 2006. The database is available to all TCEP members, and may be used for speaker or panelist recruitment for educational emergency medicine events and for mentor identification for physicians, residents, and medical students. The database is divided geographically according to the Texas Emergency Medicine Task Force regions.
