Background and Context

As digitalisation increasingly affects healthcare, the ABN has identified the need for an advisory group specifically focused on Data and Devices.

Objectives of the Data and Devices Advisory Group

To offer guidance and support to the ABN Exec, council, and Committees on issues related to any aspect of digital neurological care, transformation or innovation.

Structure and Membership

- Up to 12 members, with a variable number influenced by interest and volume of consultations
- One chair, one deputy chair
- Media representative
- Nominated lead for guidelines
- Related specialist to be nominated

Roles and Responsibilities

Members will contribute their expertise to the preparation of informed and balanced responses affecting the practice of digital neurology.

Procedure for Appointment

- Nominees submit a CV and a 300-word statement
- Chairs and members are ratified by the Hon. Sec and approved by the ABN Council

Duration of Tenure

- Three years, renewable for a maximum of two further terms of three years

Conclusion and Contact Information

For further inquiries, please contact the ABN Office.
