ACADEMIC MEMBERSHIP: SUPPORTING THE DEVELOPMENT OF FUTURE HEALTHCARE LEADERS

Academic Membership with The Beryl Institute supports the expansion of patient experience educational opportunities for students and faculty and provides a network for those committed to expanding research and evidence on patient experience. Access to the community and its resources provides an avenue to learn from and share views and ideas that will shape the future of patient experience and healthcare.

Academic Membership allows any institution that offers a healthcare related degree program to provide membership access to currently enrolled students and faculty. The annual membership fee of $1,000, subsidized by the Institute, reflects our commitment to expanding interdisciplinary education, knowledge and connection as we prepare the future leaders in healthcare.

MEMBERSHIP PROVIDES ACCESS TO:

PUBLICATIONS
Patient experience publications such as white papers and research reports, to support individuals in all stages of the patient experience journey.

CONNECTIONS
A dynamic space for members to convene, engage and contribute to elevating, expanding and enriching the global dialogue on improving the patient experience.

LEARNING
Offerings that shape the evolving field of patient experience and provide students with an understanding of the industry to broaden their education and future career development.

EVENTS
Events that bring together healthcare leaders, staff, physicians, students, patients and families, allowing students to learn and network with future colleagues.

The Beryl Institute is the global community of practice committed to elevating the human experience in healthcare. We define patient experience as the sum of all interactions, shaped by an organization’s culture, that influence patient perceptions across the continuum of care.
