The Patient Experience Journal (PXJ) Awards celebrate powerful contributions to the literature and articles of impact in research and practice and introduce rising stars who are working to expand evidence and insights on patient experience and the human experience in healthcare. Identified from the articles published in PXJ and selected by the Editorial Board based on criteria noted below, award recipients represent the rigor, thoughtfulness and vision seen in all the pieces published in the journal. PXJ remains committed to elevating the work of our authors and honoring the interest of our readers by bringing together a broad and comprehensive selection of cutting-edge articles from around the world. Award recipients are celebrated every year at The Beryl Institute’s Elevate PX.

Awards categories and are selected from each volume based on the following criteria:

### REVIEW CRITERIA

- Contributes to the theoretical development of Patient Experience
- Has direct and positive implications on the practice of Patient Experience
