

Heartbeat (HB) Strips in a Bottle

This memento is for our CMO/EOL patients during the COVID pandemic

- First, validate that there is a copy of the patient's heartbeat
 - Patient is still on monitor
 - ECG or scanned strips in patient's chart
- If there is a captured heartbeat, engage the patient's loved ones, if applicable, to see if they would like a Heartbeat memento
 - Please note, we need to limit to 3 per patient

Process:

- Print current HB strip
 - If, printing from a cardiac monitor – photo copy the heartbeat as the monitor paper rhythm fades over time
- Choose language most appropriate for patient's tag.
 - English, Spanish, and Russian are provided.
 - If another language is needed, please contact **Meghan Brewer** from Child Life on **cortext** or page at **98276**
- Tie ribbon to tube as seen below.
