Mission Statement

The Theriogenology Foundation is a global resource that supports education and research in reproductive medicine; ensuring that future generations of animals continue to enrich our lives through service, companionship, and food for a growing human population while conserving our natural resources.

From the pen of the president

The global strategy for 2020 has become survival. In February, while China was already facing hundreds of fatalities from a coronavirus infection-associated pneumonia, eight of us were eagerly packing our bags to head to Detroit for the TF Strategic Planning meeting. One day before departure, a Midwestern snowstorm bore down on Michigan, grounding our group. Drs. Hopper and Floyd arranged a Plan B at Auburn, where a ZOOM meeting brought the great thinkers from Michigan, Alabama, Mississippi and Boston together through technology. Almost.

My lack of preparedness to work remotely became evident. As displayed in the photo, I was the keeper of all the easel-paper charts and talking points which had been neatly packaged in a FedEx tube for travel. Camera on my computer for ZOOM hookup? Not a chance. Audio through the PC? Nope. PowerPoint for the team? Negative. Nestled in the mecca of Boston high tech, I instead sent cellphone shots of the papers that I had scotch-taped around my home office, fought with the GE speaker phone button on my landline, and connected to our patiently waiting strategists. After lamenting how weather had forced us to shelter-in-place, we spent the next 7 hours glued to our chairs discussing the survival of the Theriogenology Foundation. Truly.

A few key events required us to change the course of the Theriogenology Foundation. Dr. Charles Franz gave notice of his resignation as TF Executive Director in December. In January at the Combined Board meeting, a proposal for ACT, SFT and TF to equally share the funding of a new ED position was rejected. Since the TF alone could not financially sustain this position, the TF had to be restructured. Ultimately, the Strategic Planning Committee recommended a Foundation which will primarily fund and administer the core student support functions of travel, research and education. All the great student opportunities such as the student chapter grants, externships and residencies are still in place. The Theriogenology Foundation will cease to administer the Working Dog Project, and has transferred ownership, assets and control to the Darwin’s Ark Foundation (www.darwinsark.org).

By March, it was a virus, not terrorism or the weather, that was grounding planes and halting businesses. Years ago, we defined the Theriogenology Foundation through our mission statement as “a global resource that supports education and research in reproductive medicine; ensuring that future generations of animals continue to enrich our lives through service, companionship, and food for a growing human population while conserving our natural resources.” I still believe that veterinarians are central to the immense challenges of animal productivity, food safety/security and sustainability. But for now, a smaller and more narrowly focused Foundation will hunker down to protect the ability of our students to learn and expand their knowledge and competency in theriogenology. Our proposed new mission statement is: The Theriogenology Foundation supports education and research in animal reproductive medicine. Period.

As for me, I either need to sign up at the local community college for computer education or finally retire to the rocking chair on the front porch. I’ll let you know in July, either in person or via ZOOM. Stay well.

Anita M Migday DVM MS
Dr. David E. Bartlett Award for Lifetime Achievement in Theriogenology

Dr. Terry Blanchard

Dr. Terry Blanchard studied at K-State and received his Doctorate in Veterinary Medicine in 1976. He was in a mixed animal practice at Smith Animal Clinic, Inc., Crown Point, Ind., for a year after graduation. Dr. Blanchard joined the U.S. Peace Corps in the Philippines where he taught pre-veterinary students and performed research on reproduction in water buffaloes from 1977-1979. Dr. Blanchard wrote a thesis on the effects of anabolic steroids on stallion testicular function while working on his master’s degree. He received his master’s degree from the University of Missouri in 1983. He completed his residency in large animal reproduction at the University of Pennsylvania, New Bolton Center in 1981, and then joined the faculty at the University of Missouri-Columbia. He became certified as a Diplomate in the American College of Theriogenologists in 1982. He rejoined the faculty at the University of Pennsylvania from 1984-1986. Dr. Blanchard then joined the faculty at Texas A&M University from 1986-2005. He moved to Lexington, Ky., as a resident veterinarian at Hill’n’ Dale Farm from 2005-2007, and rejoined the faculty at Texas A&M University in 2008. He has been a faculty advisor to approximately 40 resident/graduate students. Dr. Blanchard is the co-author and editor of two textbooks on stallion reproduction and one textbook on equine reproduction, 18 book chapters, and over 130 referenced journal publications.

Dr. Blanchard has served as secretary of the ACT Examining Committee and was recognized in 2006 as the ACT Theriogenologist of the Year. Dr. Blanchard is currently a member of American Veterinary Medical Association, American Association of Equine Practitioners, Texas Equine Veterinary Association, Kansas Veterinary Medical Association, Society for Theriogenology and American College of Theriogenologists.

Dr. Blanchard is married to Kathleen. He has four daughters: Shanna, Holly, Katie and Angela; and two sons: John and Michael.

Amazon shoppers - Here's a way to raise money for the Theriogenology Foundation

Shop on Amazon? The Theriogenology Foundation has signed up with AmazonSmile to receive funding through your shopping. Amazon will donate 0.5% of the price of each eligible AmazonSmile purchase to Theriogenology Foundation whenever you shop on AmazonSmile. AmazonSmile is the same Amazon you know. Same products, same prices, same service. Bookmark the AmazonSmile link on your computer and support the Theriogenology Foundation each time you shop!

Visit smile.amazon.com/ch/27-0250382 and Amazon donates to Theriogenology Foundation.
From the Executive Director

It is hard to believe, but I am now completing my tenth year as your Theriogenology Foundation executive director. The years have passed by quickly, but the time has come for me to step back. While I will continue as the executive director for the ACT and SFT, the TF Board will be making a decision soon on a new executive to lead the organization.

Please allow me to share some reflections and thoughts with you. The incredible story of the Foundation is captured in video on our website. For those of you who have not seen this, I’d encourage you to follow the link from the home page: www.theriofoundation.org. The accomplishments of the TF are not just significant, they are outstanding! The credit for such an incredible ride goes to each and every one of you. Many of you have been supporters for all of these ten years. You have volunteered your time, given of your expertise and unique perspectives, and supported the Foundation through your current and future financial gifts.

I wish to thank all 47 individuals who have served various terms on the Board of Directors. Each of you has brought your individual experiences to these positions and have always served the TF in exemplary fashion. The leadership you have provided in educational program development and research review and support has made a difference in the lives of veterinarians, students and the animals we all care for.

Ten of you have served as TF officers and provided significant nurturing of a startup foundation to make sure that the TF not only made it, but thrived in support of its mission. Additionally, the work of our two presidents, Tom Riddle as the founding president and Anita Migday as the president since 2011, have provided vision, sound guidance, countless hours of dedication and tremendous financial support. I am blessed to have been able to work closely with both of them and to be able to call them my friends.

Many individuals and businesses have donated to the TF on an annual basis throughout TF’s history. Excellent leadership, creative ideas and commitment were essential to accomplish our goals but equally essential was the strong commitment of donors. There are not words to express my gratitude for your support! 2019 donors alone total 609 and are listed in this issue. Your support has enabled the TF to accomplish and support all the activities listed in this issue.

TF program giving over ten years in support of the mission equals $2,211,700. Support of Education leads the list with over $1.4 million, followed by Research with over $680 thousand, Travel Grants at over $68 thousand and Recognition and Awards at almost $20 thousand. See page 8 for details of this program giving.

While this is not a retirement for me as I continue to work with the SFT and ACT, it is an opportunity to spend a little more time with two grandsons who just might enjoy fishing and paddling as much as Grandpa. Since moving to a rural area a couple years ago, my community involvement has grown with service in our volunteer fire department and my list of home and yard projects seems to get longer rather than shorter.

My career in veterinary medicine has taken me on several very divergent paths. The last ten years of working with the Theriogenology Foundation has been exciting and gratifying. The ability to become friends with many of you and working together for theriogenology has been a huge part of that positive experience. While I am disappointed that we will not all be together in Pittsburgh this summer, I thank you for your support and look forward to seeing you at future meetings of the SFT, ACT and TF when, hopefully, social distancing will be a memory from the past.

Charles F. Franz, DVM

Save the Date now to join us at the following locations for the Annual Therio Conference:

**2021**
July 21 – July 24 | Omaha, Nebraska

**2022**
July 20 – July 23 | Bellevue, Washington

Charles F. Franz, DVM
TF Grants at Work

Kansas State – Student Chapter Grant

On February 4th, 2020, ten veterinary students from the K-State College of Veterinary Medicine traveled to Abilene, KS to visit Dr. Kent Law and his team at Symbion Inc.. Located in the heart of greyhound country, Symbion Inc. specializes in canine reproductive services. The evening started with a discussion on the current direction of canine breeding as well as breed differences and export markets. Following a tour of the clinic, students had the opportunity to observe the process of collecting vaginal cytology samples. Dr. Law, Dr. Steele and three of their technicians led students through hands on evaluation of the vaginal cytology samples and thawed semen. Members of the K-State Theriogenology Club would like to extend a huge “thank you” to the Theriogenology Foundation for financially supporting this educational opportunity and the team at Symbion Inc. for sharing their knowledge and passion for theriogenology with us!

Michigan State University – ACT Student Outreach Grant

The Student Chapter of the Society for Theriogenology at Michigan State University College of Veterinary Medicine (MSU CVM) would like to thank the Theriogenology Foundation and the American College of Theriogenologists (ACT) for their generous support that allowed us to host our first embryo vitrification event. On January 21st, Dr. Sarah Eaton, DVM, DACT, CVA from Saginaw Valley Equine Clinic travelled to MSU CVM to give our club members a lecture about equine embryo transfer. Following the lecture, she hosted a hands-on lab for students to practice manipulating, vitrifying, and thawing live embryos. Dr. Eaton’s lecture covered topics regarding the benefits of embryo transfer in horses, how to evaluate embryos, and the steps involved in embryo collection and vitrification. Each student was then provided with a live bovine embryo to practice the techniques that were discussed in the lecture. The first portion of the lab was spent learning how to thaw an embryo, locate it in the well-plates, and move it between different medias. After students became comfortable with embryo manipulation, they spent the second half of the lab mastering the vitrification process. Once embryos were successfully vitrified, students could thaw their embryo again and practice vitrifying them multiple times. This event was an amazing opportunity that exposed students to a field of theriogenology that they may not have previously considered. It received a lot of positive feedback from participants and the club would love to offer this event again in the future.

Shanna-Lynn Neily Student Externship Report

For one of my fourth-year clinical rotations, I spent three weeks at Broadview Animal Hospital.

Broadview is a small animal general practice made up of 13 veterinarians that offer reproductive services. During my time at the practice, I experienced all aspects of reproductive medicine as well as general practice appointments and cases. I was given the opportunity to scrub in and assist with various surgical procedures, such as ovariohysterectomies, neuters, cesarean sections, exploratory laparotomies, mass removals and a vasectomy. Testicles removed during surgery were kept to allow me the opportunity to practice epididymal harvest techniques. On multiple occasions I observed and learned the steps for different artificial insemination techniques. I then practiced these techniques on a uterus removed during an elective ovariohysterectomy.

In addition, I learned the various tools needed to assess fertility, evaluate stage of estrous, confirm pregnancy and determine the bitch’s due date. I was also exposed to various aspects of male reproduction, which included breeding soundness exams and semen collection, evaluation and freezing.

This externship solidified my interest in small animal reproduction and confirmed my desire to pursue this specialty upon graduation. I’d like to thank Broadview Animal Hospital for giving me this great learning experience and the Theriogenology Foundation for granting me the funds and support to make this externship possible.

www.theriofoundation.org
Dr. Joanna Koilpillai received her Bachelor's Degree in Veterinary Science and Animal Husbandry (BVSc & AH) from Madras Veterinary College (MVC), Chennai, India in November 2018. She attended the Casual Visitor Program at North Carolina State University in May 2017 under the supervision of Dr. Scott Bailey and Dr. Theresa Beachler, with a primary focus on Equine theriogenology. Dr. Koilpillai received the first prize for her clinical case study on “Contrast Echocardiography in locating a heart base tumor in a Bull Dog” in the TANUVAS 9th All India Veterinary Student Conference in the Companion Animal category in August 2017. She was awarded the first prize in the Online 2018 VetX International Student Essay Competition conducted by VetX and College of Veterinary Education, University of Sydney, Australia for her essay titled “Mesothelioma - A State of the Art Review”. She was an active participant in the MVC Study circles on “Equine care and management”, “Laboratory diagnostics” and “Small animal critical care”. She also helped to organize and participated in a free Bovine and Caprine Infertility camp with pregnancy diagnosis, infertility screening and basic treatment.

Soon after her graduation, Dr. Koilpillai underwent surgical training in Animal Birth Control through a certificate course conducted by Worldwide Veterinary Service (WVS), Ooty, India with the primary focus on canine surgery. She worked at Raksha Pet Clinic, (a mixed animal practice) in Chennai, India as an Associate Veterinarian until June 2019. In her free time, she volunteered at Blue Cross of India in the outpatient ward and provided free treatment for rescued stray, abandoned or injured animals with MVM Madras Animal Lover’s Group.

Since June 2019, Dr. Koilpillai is pursuing a rotating internship at Veterinary Healthcare Associates, an AAHA Accredited, small animal practice located in Winter Haven, FL. The rotations include General Practice, ER, a 24-hour Intensive Care Unit and Internal Medicine with two ABVP Board certified specialists. She is an active participant in the monthly Journal Club, MnM Rounds and Didactic lectures. Dr. Koilpillai is a Certified Operator in Hyperbaric Oxygen Therapy. She is also certified as a Laser Safety Officer by ACT Online and is completing her laser therapy certification with Companion Laser. She is currently undergoing Certification in Fear-free handling as a Veterinary Professional and RECOVER CPR - Basic and Advanced Life Support.

Dr. Koilpillai’s interests are in mixed species theriogenology and small animal medicine.

You Choose How to Give

Planned Giving
Planned Giving provides the opportunity to donate to the Foundation through your trust, will, and other assets as you choose, to leave a legacy for a cause you are passionate about. The “Plan-a Gift” section on the TF website is particularly helpful for guidance on gift options. There are giving options for all levels and numerous tools for choosing the gift that best suites your needs. An attorney’s counsel is also recommended.

Annual Giving
Your yearly contribution can be used to sustain existing projects or spearhead new research to advance the science and practice of animal reproductive medicine. You determine your level of giving and direct your contribution towards education, research or achievement recognition. Every donation counts!

Honor Gifts
Honor gifts serve as a meaningful way to recognize someone special while supporting the important work of the TF. Acknowledge the accomplishment of a friend or family member with an honor gift. Celebrate a special event, birthday or anniversary in the life of someone important to you. Make a tribute to an animal which has made an impact in the life of someone you know. A letter acknowledging your gift will be sent to the recipient.

Memorial Gifts
A memorial gift can be made to recognize the loss of a beloved family member, friend or colleague. Memorial gifts pay tribute to the individual by affirming their passion for science, education and the continued advancement of knowledge in our specialty. The Foundation will notify a designated contact in writing to both acknowledge your donation and convey sympathy for their loss.

Corporate/Club Gifts
Corporations and organizations may contribute to the Foundation’s general fund or may restrict their donation to champion a specific project or species.

Creative Giving
Use your creativity, motivation and commitment to launch a TF fundraising event through your hobby club, book club, sports team, office or service group. Share your personal achievements and passions for running, swimming, baking or biking by making it a fundraising event that includes friends and family.

Therio Auction Support
Annually, the Foundation conducts a silent and live auction during the Therio Conference. This event has become a great fundraiser for the Foundation. If you cannot attend, you can submit a sealed bid form on any item you choose. Visit www.theriofoundation.org to view the auction and submit your sealed bid form.

Planned Giving Donors
Thank you to the following supporters for their generous designated gifts to support theriogenology and the Theriogenology Foundation. Have you been thinking about this but just not finished setting it up? Please give us a call for more information or to let us know when you have included TF in your will. Your planning now will support theriogenology in the future and insure that your wishes are fulfilled.

TF Donor Recognition

Contributions to the Theriogenology Foundation increase educational opportunities, support research and enhance the field of theriogenology.

Supporting our Future: Levels of Annual Individual Giving

- **Genesis Society:** $5,000 or more
- **Visionary:** $1,000-$4,999
- **Pathfinder:** $100-$999
- **Supporter:** $25-$99

Donors will be recognized in the Foundation publication THERiver.

Rocky Mountain Society
This Society recognizes donors who have made an annual commitment to giving at the Supporter Level or higher for five or more consecutive years. The milestone years for recognition in the Society are 5, 10, 15, 20 and 25 consecutive years.

The 10 year level is known as the Dr. S. J. Roberts Circle of the Rocky Mountain Society.

The 20 year level is known as the Dr. David Bartlett Circle of the Rocky Mountain Society.

First-time Rocky Mountain Society members, or those reaching new milestones, will receive by mail a RMS welcome letter and lapel pin denoting the milestone period of consecutive year giving.

1954 Society
This Society recognizes donors whose legacy gifts play a key role in securing the future of the Theriogenology Foundation. These donors have remembered the TF with a lifetime income gift or as a beneficiary of a will, trust, retirement plan, or life insurance policy.

The 1954 Society is named for the year in which the Rocky Mountain Society for the Study of Breeding Soundness in Bulls (now the Society for Theriogenology) was organized. Circles within the 1954 Society provide for additional recognition opportunities:

- **Legacy Circle** honors donors whose cumulative lifetime giving totals between $60,000 and $100,000.
- **Founders Circle** honors cumulative lifetime giving that totals between $100,000 and $150,000.
- **Inventors Circle** honors cumulative lifetime giving that totals between $150,000 and $200,000.
- **Fertile Circle** honors cumulative lifetime giving exceeding $200,000.

An appropriate plaque and lapel pin will be presented for each level of recognition. Members of the 1954 Society will be invited to attend a private stakeholders reception at the Annual Conference and will receive updates on Foundation giving news.

www.theriofoundation.org
The Theriogenology Foundation is very grateful for the $140,298 of funding you have provided during this 12 month period.

Your tax deductible support and philanthropic investment brings us ever closer to the goals we have set for theriogenology and our Foundation. There is no gift too great or too small, and the Foundation is continually adding new programs to offer you ways to donate that meet your specific needs, such as our Planned Giving options. Visit www.theriofoundation.org or contact the Foundation office for more information.

10-Year Impact: Theriogenology Foundation 2009 - 2019

The Theriogenology Foundation Honor a Mentor Program

Have you had mentors in your early years as a part of the veterinary profession and throughout your career who have influenced your theriogenology interest? Would you like to honor them with the recognition they deserve? You can nominate these mentors for recognition through the Theriogenology Foundation.

Once donations reach $1000 (you and your colleagues can pool donations to reach this level) your mentor’s name will be listed as a nominee for recognition. When donations total $5000, your mentor, along with a brief biography, photograph and select comments from nominators, will be highlighted on the website, in THERiver, at the Therio Conference and in other ways.

**Update on Summer Meeting Plans**

As I write this, the SFT Board has just decided to cancel our onsite convention in Pittsburgh next month. While continuing education will be offered through a virtual environment, social events will be placed on hold for a year. This includes our usual Theriogenology Foundation fundraisers, storytelling night and the benefit auctions, where approximately half of the annual TF donations are raised.

Please mark your calendars for the 2021 Annual Meeting of the SFT, ACT and TF – Omaha, Nebraska, July 21-24. Storytelling night, along with silent and live auctions will return, plus exciting new events and program announcements.

Because of successful 2019 fundraising events, appropriate expense controls and extremely generous donors, we do have reserves. But with the challenges that 2020 has brought, your TF will appreciate any donation you can provide for continuing support of our missional giving.

Thank you for your ongoing support. Please contact me or any member of the Theriogenology Foundation Board if we may be of assistance.

Charles F. Franz, DVM

---

**From the TF Fundraising Committee**

Times have greatly changed. Charitable giving has been severely affected by the dismal state of the economy. I suspect that many of us who have contributed to the Theriogenology Foundation in the past are now choosing to donate to charities providing for the basic needs of those who now need them most in our local communities. That is as it should be. But we will emerge from this, as will the TF.

In the immediate future the TF will continue to support its established obligations to support student chapters and research. For the longer term, the TF will grow again and expand its support for the priorities recently identified by members of SFT and ACT. The membership survey completed at the end of 2019 ranked those priorities in descending order:

1. Sustain and strengthen theriogenology teaching at veterinary schools
2. Veterinary student support (scholarships, externships, travel to meetings, SFT Student Chapter speaker support, etc.)
3. Research grants selected on merit (food animal, equine, and companion animal)
4. The Working Dog Project
5. Projects to enhance conservation of endangered species

The top two priorities in the survey concern students and education. As we prepare for the future, the TF Board will focus on these first. In the meantime, in addition to supporting your local community, please consider a tax-deductible donation to TF. It takes no time at all and is super easy to do using the cell phone app.

---

**THERIOGENOLOGY FOUNDATION - WHO WE ARE**

The Theriogenology Foundation is a global non-profit which believes that the preservation and reproduction of animals is essential to human welfare. By engaging specialists in animal reproductive health and productivity, the Theriogenology Foundation formulates and implements solutions to combat human and animal diseases which threaten food security and the social and economic health of the world’s population.

---

**THERIOGENOLOGY FOUNDATION’S MISSION**

The Theriogenology Foundation is a global resource that supports education and research in reproductive medicine; ensuring that future generations of animals continue to enrich our lives through service, companionship, and food for a growing human population while conserving our natural resources.

---

The Theriogenology Foundation now offers an easier way to support our mission!

To donate text one of the following codes to 44321:

**CONSERV** - Projects to enhance conservation of endangered species

**RES11** - Research grants selected on merit (food animal, equine, and companion animal)

**EDU11** - Sustain and strengthen theriogenology teaching at veterinary schools through support for Therio Residencies and faculty positions.

**STU11** - Veterinary student support (scholarships, externships, travel to meetings, SFT Student Chapter speaker support, etc.)

**WDP11** - The Working Dog Project – Research project to enhance scientific selection and production of working dogs (Military Working Dogs, assistance dogs, detector dogs, guide dogs, etc.)

**TFB11** – Theriogenology Foundation Board discretion (unrestricted)

You will get a secure link texted back that will take you to the mobile donation page. From there, you can select your amount to donate.
Donate your required minimum IRA distribution to the Theriogenology Foundation

Did you know? People age 70½ or older can transfer funds directly from an IRA to a qualified charitable organization like the Theriogenology Foundation. While the contribution isn't deductible, it's not subject to income tax, either. Since the donation of the IRA money would otherwise be taxed when you withdraw it, this equates to a 100% deduction for the amount donated, up to $100,000.

To qualify for this tax break, the distributed funds must go directly from the IRA trustee to the charitable organization.

Consult your tax professional for more information or give us a call with any questions.

Donating to the Theriogenology Foundation

Did you know that there are several ways that you can make a donation to the Theriogenology Foundation that will not affect your current lifestyle, or will even pay you an income? You can leave benefits from a Retirement Account, Life Insurance policy, real estate or personal property (collectibles, art, books). Take advantage of the many creative ways to benefit yourself, your beneficiaries and the Theriogenology Foundation while saving tax dollars in the process. Please take a moment to explore the Planned Giving page on the Theriogenology Foundation's website.
