Mission Statement

The Theriogenology Foundation supports education and research in animal reproductive medicine.

From the pen of the president

Wow! What a year! I hope this finds all of you healthy. One year ago I was learning to negotiate curbside service, trying to understand what type of a/c filters would trap viruses, and figuring out which masks would not leave my ears raw. All this while dealing with an unexplainable increase in workload. It seems like January, 2020 was a very long time ago.

Along with learning how to practice in a pandemic, it didn’t take much reflection to realize the other important aspects of life. Faith has always been a priority for me. Time with family became precious, particularly those family members that the pandemic made more difficult to see. The same goes for friends and our therio family. I am very excited to have an “in person” conference in Omaha this July. There are so many of you that I ache to see, and as great as zoom is, it is not the same.

The TF board has been busy during the last year. We have worked to continue providing benefits to students, with your help, to fund externships, research, student chapter events and speakers. The AKC/AKC CHF/TF residency program is still going strong. Although the Working Dog Project is not directly affiliated with TF, we are still supporting the important work that WDP is doing. And our newest project, the Nandi Scholars Program, is up and running. We will be presenting four scholarships to some incredible fourth year veterinary students in Omaha this year.

None of this would be possible without the hard work of many. Importantly, many of the individuals responsible for the success of these programs are not TF board members. When Dr. Jim Floyd, who heads up the Nandi Scholars Program, put together a team of applicant reviewers, I was pleased (but not surprised) at how quickly our SFT/ACT membership stepped up to the difficult task of reviewing the applications. A huge thanks to all who helped make this possible.

We are able to continue to help so many thanks to the generosity of all of you. Thanks for your support. I hope that you will be able to attend the awards banquet this year in Omaha and get to meet our inaugural group of scholarship recipients.

Please stay well. Please don’t hesitate to contact me if I can help you in any way. I’m looking forward to seeing everyone sans the computer screen.

Mike
Dr. David E. Bartlett Award for Lifetime Achievement in Theriogenology

Dr. Donald Schlafer

Dr. Schlafer is known both nationally and internationally as an expert in reproductive pathology of domestic animals, with particular expertise in placental pathology. He received his DVM in 1974 from Cornell and continued his academic career by studying the effects of African swine fever on pregnant, fetal, and neonatal pigs, receiving his PhD in 1982 from the University of Georgia for this work. He became board certified not only in ACT, but also in the American College of Veterinary Pathologists and the American College of Veterinary Microbiologists. His activities at Cornell in the veterinary pathology service and research in reproductive pathology centered on placental disorders and diseases. Dr. Schlafer has contributed to both ACT and SFT through committee membership and participation in educational programs. He has served as Treasurer and on the Examination Committee of ACT. His dedication to theriogenology and the College has been evidenced by his work, while on the Exam Committee, to reorganize the entire slide database for the practical exam. This cataloging then allowed for the computerization of the database to follow. He organized and was a major contributor to the SFT/ACT International Symposium on Reproductive Pathology presented in Montreal in 1997. He has served as a mentor for both academicians and practitioners seeking to take the ACT certifying exam. Dr. Schlafer was named Theriogenologist of the Year in 2004.

Amazon shoppers - Here’s a way to raise money for the Theriogenology Foundation

Shop on Amazon? The Theriogenology Foundation has signed up with AmazonSmile to receive funding through your shopping. Amazon will donate 0.5% of the price of each eligible AmazonSmile purchase to Theriogenology Foundation whenever you shop on AmazonSmile. AmazonSmile is the same Amazon you know. Same products, same prices, same service. Bookmark the AmazonSmile link on your computer and support the Theriogenology Foundation each time you shop!

Visit smile.amazon.com/ch/27-0250382 and Amazon donates to Theriogenology Foundation.
The Theriogenology Foundation supports education and research in animal reproductive medicine.

THERIOGENOLOGY FOUNDATION - WHO WE ARE

Have you had mentors in your early years as a part of the veterinary profession and throughout your career who have influenced your theriogenology interest? Would you like to honor them with the recognition they deserve? You can nominate these mentors for recognition through the Theriogenology Foundation.

Once donations reach $1000 (you and your colleagues can pool donations to reach this level) your mentor’s name will be listed as a nominee for recognition. When donations total $5000, your mentor, along with a brief biography, photograph and select comments from nominators, will be highlighted on the website, in THERiver, at the Therio Conference and in other ways.

https://www.theriofoundation.org/page/HonoraMentorProgram

My name is Melonie Zuercher and I am a fourth-year veterinary student at the University of Florida College of Veterinary Medicine. I have a strong interest in both small animal Theriogenology and internal medicine. In July 2021, I completed an incredible two-week externship at Highland Pet Hospital in Lakeland, Florida with Carla Barstow, DVM, MS, DACT. During my time with Dr. Barstow, I was exposed to an abundance of cases ranging from standard breedings and pregnancy ultrasounds to prostatic disorders, emergency cesarean-sections and pyometra. I gained invaluable hands-on experience performing ultrasounds and vaginal cytology, interpreting radiographs, practicing neonatal management, and more. Throughout the two weeks, Dr. Barstow also facilitated daily rounds covering important topics such as Brucellosis, medications safe for use in pregnancy, and appropriate breeding timing. Prior to this externship, I found myself with an interest in reproduction medicine, but now I am confident that small animal Theriogenology will be a part of my future. I am incredibly thankful to the Theriogenology Foundation for providing me with the Veterinary Student Externship Grant to make this externship possible.

Save the Date now to join us at the following locations for the Annual Therio Conference:

2022
July 20 – July 23 | Bellevue, Washington

2023
July 16 – July 23 | Birmingham, Alabama
Dear Theriogenology Foundation Board of Directors,

I am immensely grateful for my experience at Performance Equine Vets in Aiken, SC that was supported by a Theriogenology Foundation Student Externship Grant. I had the opportunity to explore advanced reproductive techniques in the mare, including assisting with embryo flushes, subsequent embryo recovery in lab, and transvaginal oocyte aspirations. I had the opportunity to observe and assist with an embryo transfer that was harvested through ISCI from an in-house TVA. In addition, I was involved in both routine and problem mare reproductive management in the field.

Performance Equine Vets offered me an incredibly well-rounded experience and I was heavily involved in emergency on-call during evenings and weekends where I was able to assist with referral foal medicine cases. I saw a wide variety of cases including Neonatal Maladjustment Syndrome, Rhodococcus, septic joints, failure of passive transfer, and foals with diarrhea of multiple origins. Through these cases I had the opportunity to perform new foal exams, routine TPRs, monitor foals under anesthesia, perform and review radiographs, and discuss case management with excellent mentors.

Through this externship experience, I appreciated the value of having a strong foundation in medicine for case management, especially in foals. I look forward to applying the knowledge and technical skills I gained through this experience in my future clinical rotations and very soon throughout my career in veterinary medicine.

Sincerely,
Tara Doherty
UC Davis School of Veterinary Medicine Class of 2022
Congratulations to the AKC, AKC-CHF, TF Companion Animal Residents Beginning Their Programs in 2021

Anum Ahmed, DVM
The University of Florida College of Veterinary Medicine

Dr. Ahmed received her bachelor’s degree in biology and minor in environmental studies at the University of Central Florida. She completed her veterinary degree at Kansas State University College of Veterinary Medicine. She is currently completing a small animal rotating internship through BluePearl Veterinary Partners in Tampa. After residency, she hopes to work with breeders to decrease the incidence of genetic issues in canines, promote longevity of life through proper handling and management of frozen semen, and applying research of breeding domestic dogs and cats towards conservation of our canine and feline species in the wild.

Nicole Sugai, DVM
Virginia-Maryland College of Veterinary Medicine

Dr. Sugai grew up in Saline, Michigan and attended the University of Michigan for her undergraduate degree (B.S.) in biology and evolutionary anthropology. She recently graduated from University of Illinois-Champaign-Urbana’s College of Veterinary Medicine in 2019. Her professional interests include internal medicine, soft tissue surgery, and working with responsible breeders. Dr. Nicole plans to continue progressing in ultrasonography, dentistry, and more advanced reproduction procedures. She is a member of AVMA, MVMA, Society for Theriogenology, and the American Association of Small Ruminant practitioners (AASRP). She is a member of the Poodle Club of America and President of the Poodle Club of Southeast Michigan. Outside of work, she enjoys grooming and showing her poodles for American Kennel Club conformation shows. Her pets include Stuart, a miniature poodle, Rory, a standard poodle, and Fanny, a wire fox terrier. Her other interests are watching Lions and Michigan football and cooking for her family and friends.

You Choose How to Give

Planned Giving
Planned Giving provides the opportunity to donate to the Foundation through your trust, will, and other assets as you choose, to leave a legacy for a cause you are passionate about. The “Plan-a-Gift” section on the TF website is particularly helpful for guidance on gift options. There are giving options for all levels and numerous tools for choosing the gift that best suits your needs. An attorney’s counsel is also recommended.

Annual Giving
Your yearly contribution can be used to sustain existing projects or spearhead new research to advance the science and practice of animal reproductive medicine. You determine your level of giving and direct your contribution towards education, research or achievement recognition. Every donation counts!

Honor Gifts
Honor gifts serve as a meaningful way to recognize someone special while supporting the important work of the TF. Acknowledge the accomplishment of a friend or family member with an honor gift. Celebrate a special event, birthday or anniversary in the life of someone important to you. Make a tribute to an animal which has made an impact in the life of someone you know. A letter acknowledging your gift will be sent to the recipient.

Memorial Gifts
A memorial gift can be made to recognize the loss of a beloved family member, friend or colleague. Memorial gifts pay tribute to the individual by affirming their passion for science, education and the continued advancement of knowledge in our specialty. The Foundation will notify a designated contact in writing to both acknowledge your donation and convey sympathy for their loss.

Corporate/Club Gifts
Corporations and organizations may contribute to the Foundation’s general fund or may restrict their donation to champion a specific project or species.

Creative Giving
Use your creativity, motivation and commitment to launch a TF fundraising event through your hobby club, book club, sports team, office or service group. Share your personal achievements and passions for running, swimming, baking or biking by making it a fundraising event that includes friends and family.

Theriogen Auction Support
Annually, the Foundation conducts a silent and live auction during the Therio Conference. This event has become a great fundraiser for the Therio Foundation. If you cannot attend, you can submit a sealed bid form on any item you choose. Visit www.theriofoundation.org to view items and submit your sealed bid form.

Planned Giving Donors
Thank you to the following supporters for their generous designated gifts to support theriogenology and the Theriogenology Foundation. Have you been thinking about this but just not finished setting it up? Please give us a call for more information or to let us know when you have included TF in your will. Your planning now will support theriogenology in the future and insure that your wishes are fulfilled.

1954 Society

TF Donor Recognition

Contributions to the Theriogenology Foundation increase educational opportunities, support research and enhance the field of theriogenology.

Supporting our Future: Levels of Annual Individual Giving

- **Genesis Society**: $5,000 or more
- **Visionary**: $1,000-$4,999
- **Pathfinder**: $100-$999
- **Supporter**: $25-$99

Donors will be recognized in the Foundation publication THERiver.

Rocky Mountain Society
This Society recognizes donors who have made an annual commitment to giving at the Supporter Level or higher for five or more consecutive years. The milestone years for recognition in the Society are 5, 10, 15, 20 and 25 consecutive years.

- The 10 year level is known as the Dr. S. J. Roberts Circle of the Rocky Mountain Society.
- The 20 year level is known as the Dr. David Bartlett Circle of the Rocky Mountain Society.

First-time Rocky Mountain Society members, or those reaching new milestones, will receive by mail a RMS welcome letter and lapel pin denoting the milestone period of consecutive year giving.

1954 Society
This Society recognizes donors whose legacy gifts play a key role in securing the future of the Theriogenology Foundation. These donors have remembered the TF with a lifetime income gift or as a beneficiary of a will, trust, retirement plan, or life insurance policy.

The 1954 Society is named for the year in which the Rocky Mountain Society for the Study of Breeding Soundness in Bulls (now the Society for Theriogenology) was organized. Circles within the 1954 Society provide for additional recognition opportunities:

- The **Legacy Circle** honors donors whose cumulative lifetime giving totals between $60,000 and $100,000.
- The **Founders Circle** honors cumulative lifetime giving that totals between $100,000 and $150,000.
- The **Inventors Circle** honors cumulative lifetime giving that totals between $150,000 and $200,000.
- The **Fertile Circle** honors cumulative lifetime giving exceeding $200,000.

An appropriate plaque and lapel pin will be presented for each level of recognition. Members of the 1954 Society will be invited to attend a private stakeholders reception at the Annual Conference and will receive updates on Foundation giving news.
2020 Financial Summary

Financial breakdown from January 1, 2020 through December 31, 2020

The Theriogenology Foundation is very grateful for the funding you have provided during this 12 month period. Your tax deductible support and philanthropic investment brings us ever closer to the goals we have set for theriogenology and our Foundation. There is no gift too great or too small, and the Foundation is continually adding new programs to offer you ways to donate that meet your specific needs, such as our Planned Giving options. Visit www.theriofoundation.org or contact the Foundation office for more information.

2021 Theriogenology Foundation Conference Fundraising Events

WOW......because of your GENEROUS support, the Theriogenology Foundation raised $74,431.13 at this year's Annual Conference! A special thank you to everyone who donated or purchased items in the Live Auction, Story Teller Sponsorships, text-to-donate voting, and Nandi Scholar donations. A special thank you to Drs. Jim Floyd and Mike Thompson for all the work they put into organizing the auction and Story Night. Many thanks to our auctioneer Ron McDaniel from Merck Animal Health for always making the Live Auction an exciting evening. The Storyteller in Chief Award went to Dr. Isaac Bott by audience voting in the text-to-donate fundraiser.

www.theriofoundation.org
The THERIOGENOLOGY FOUNDATION announces its inaugural class of NANDI SCHOLARS in 2021

In 2021 the Theriogenology Foundation (TF) initiated the NANDI SCHOLARS PROGRAM based on the results of a 2020 survey in which the members of SFT/ACT designated support for students and teaching as the main priority for funding. In January – February, 2021 seventeen senior veterinary student SFT members submitted application packets online. They were an outstanding group; thirteen applicants from eleven different U.S. schools and four applicants from four different Canadian schools.

The selection process was objective, with each application packet receiving 16 separate reviews, each awarding a numerical score based on ten criteria. The four students selected as Nandi Scholars were those with the highest average normalized scores. Sufficient funding was available to award $10,000 to each.

The following team of seventeen SFT/ACT members conducted the reviews, for which they deserve great credit for devoting significant time and wisdom to the effort.

Jane Barber

The following four Nandi Scholars will be introduced and receive their checks at the awards banquet at the Theriogenology Annual Conference in Omaha, Nebraska on Friday, July 23.

Shelbey Nagle – Washington State University
Shelbey is an independent, highly motivated leader who focuses on bovine reproduction with interest in reproduction across species. She was previously awarded a prestigious Amstutz Scholarship from AABP. Emphasizing her wealth of experience and dedication, she received excellent reference letters both from faculty members and the Montana veterinarian who has hired her to work in his practice.

Jonathan Richardson - Purdue University
Jonathan is primarily interested in cattle reproduction although he intends to incorporate reproduction in other species, including canines into his activities in a private mixed practice in Indiana after graduation. One faculty reference stated that Jonathan is the single best student he encountered in 36 years of academic teaching.

Olivia Walker – Lincoln Memorial University
Olivia’s interest is equine reproduction research. She spent three full summers and additional interim time working at the University of Kentucky – Gluck Equine Research Center. Because of her intellectual and scholarly input, she has already been a coauthor on four published papers in the refereed scientific literature. She is seeking entrance into a PhD program.

Julia Zuercher – Virginia Tech University
Julia focuses on small animal reproduction. One faculty member reported that she was the best candidate they ever had for a therio residency position but for family reasons she opted for private practice in North Carolina where she intends to expand that clinic’s capabilities. She constructed a detailed business plan for the practice which lays out the specifics of how the practice will accomplish this.

Dr. Mike Thompson grew up in rural Benton County, Mississippi on a row-crop and cattle farm. Even though he was too young to fully grasp all that being a veterinarian involved, he proudly proclaimed as a boy that he was going to become an animal doctor one day. The older he got, the more certain Dr. Thompson became: he wanted to dedicate his life to veterinary medicine and help all the animals and pet parents that he possibly could! His dream has come full circle, and he's now the proud owner and operator of Willow Bend Animal Clinic.

Dr. Thompson was accepted into Mississippi State University’s College of Veterinary Medicine in 1983 after only two years of undergraduate education, and graduated with his Doctorate in 1987. He practiced for the next year in Ripley, Tennessee before moving closer to home and working in Tupelo and Guntown. After three years of fantastic learning and growing opportunities there, Dr. Thompson joined the team here at Willow Bend Animal Clinic. He purchased half of the clinic in early 1992, and the rest in early 2018. Now, he’s been a member of the hospital family for more than 28 years and couldn’t be happier to continue serving the pets, livestock, and animal owners of this area.

Dr. Thompson is proud to have been recognized with multiple awards and accolades over the years. He was named Young Veterinarian of the Year by the Mississippi Veterinary Medical Association in 1997, and became board-certified in theriogenology (reproductive medicine in animals) in 2007. In 2015, Dr. Thompson served as program chair for the Annual Conference for the Society of Theriogenology in San Antonio, and was named Veterinarian of the Year by the MVMA in 2016. He’s also proud to have served as President of the Society for Theriogenology 2016-2017, Treasurer of the Theriogenology Foundation, and currently has served as the Theriogenology Foundation President since 2020.

When he has time away from work, Dr. Thompson enjoys hunting and fishing, and would also like to finish restoring his old Jeeps. He’s also fond of spending quality time with his family and pets at home. He and his wife of more than 30 years, Terry, have two children: Rebecca, a dentist who practices in Little Rock, and Joshua, who has joined Dr. Thompson at his practice. The family shares their lives with Bonnie, a loveable Border Collie; a pair of Jack Russell Terriers named Chip and Ringo who never fail to make Dr. Thompson laugh; and four horses.
Donate your required minimum IRA distribution to the Theriogenology Foundation

Did you know? People age 70½ or older can transfer funds directly from an IRA to a qualified charitable organization like the Theriogenology Foundation. While the contribution isn't deductible, it's not subject to income tax, either. Since the donation of the IRA money would otherwise be taxed when you withdraw it, this equates to a 100% deduction for the amount donated, up to $100,000.

To qualify for this tax break, the distributed funds must go directly from the IRA trustee to the charitable organization. Consult your tax professional for more information or give us a call with any questions.

Donating to the Theriogenology Foundation

Did you know that there are several ways that you can make a donation to the Theriogenology Foundation that will not affect your current lifestyle, or will even pay you an income? You can leave benefits from a Retirement Account, Life Insurance policy, real estate or personal property (collectibles, art, books). Take advantage of the many creative ways to benefit yourself, your beneficiaries and the Theriogenology Foundation while saving tax dollars in the process. Please take a moment to explore the Planned Giving page on the Theriogenology Foundation’s website.

Gifts That Pay You Income
Which Life-income Gift Best Fits Your Needs?
- Charitable Gift Annuity
- Deferred Gift Annuity
