Super-Tek Products Inc.

has been providing the ceramic tile and stone flooring industry with quality adhesives, mortars, grouts and maintenance products since 1978. STP was founded and remains, a family owned and operated business that believes in extending family trust and consideration to all our clients in the form of cooperative, congenial support and service.

In 2008 Super-Tek Products made a thoughtful investment to renovate its facility, transforming it into one of the most elite manufacturing facilities here in NYC. The facility boasts of new manufacturing space, a state of the art pallet racking system that spans six stories high, an advanced research and development lab, topped off with modern and elegant offices. That year the building was awarded “BEST INDUSTRIAL REHABILITATION” by the Queens Chamber of Commerce.

With the expansion of the plant, STP bolstered its mission of providing outstanding service, reliable technical support, and quality products to the demanding tile installation marketplace. Concomitantly, we continue to work with the leading vendors around the world to ensure our products are sourced with the most advanced raw materials.

We are the only manufacturer in New York City of Tile & Stone Installation Products, with a unique suite of distinct services providing superior value to Architects, Dealers, and Contractors alike.

Our Tailored Services include...

Delivery and Availability

- Weekly Delivery
- Special Delivery
- Strategic Planning and Forecasting Service
- Local Customer Pick-up
- Guaranteed Pick-up availability within 2 hours for in-stock products
- Easy order placement by phone, fax, email, or salesperson

Customized Training

- Staff Training for our Dealers
- Contractor Training
- Onsite Demonstrations

Special Services

- Customized Order Amounts
- Private Label Services
- Harmonized Marketing Programs
- Trial Offers
- Jobsite Technical Support
- Customer Direct Technical Mentoring
- Construction Plan Review
- Custom Grout Color Matching

MORTARS

Super-Tek mortars bond all types of ceramic, porcelain and natural stone tile to a variety of substrates. Formulated to meet specific job considerations, our mortars include both standard and premium thinsets, along with rapid-set and medium-bed capable products. Professional installers were kept in mind during the formulation of these products to ensure ease of installation and top notch performance.

Dual Mix

High Performance thinset mortar for residential to light commercial applications.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A118.1

Recommendation:	Ceramic Tile
Installation:	Interior Only
Approved Substrate:	Cement Bed, Cement Board

Porcelain-Set

Economical, polymer-modified thinset mortar for porcelain tile.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A118.4

Recommendation:	Porcelain Tile
Installation:	Interior Only
Approved Substrate:	Cement Bed, Cement Board

One Step

High Performance, polymer-modified thinset mortar for residential to heavy commercial applications.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A118.4

Recommendation:	Ceramic Tile, Porcelain Tile, Pavers, Natural Stone
Installation:	Interior and Exterior
Approved Substrate:	Exterior Grade Plywood, Cement Bed, Cement Board

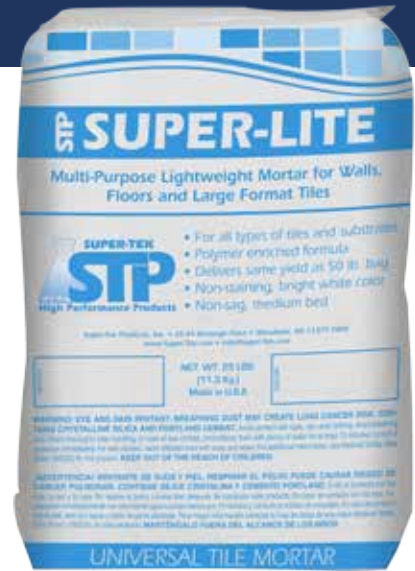

Super-Lite

Polymer-modified medium bed lightweight mortar for large format tiles. Extremely creamy, non-staining and non-sag with strong adhesion. Trowels like an adhesive!

- For Floor and Wall
- Meets or Exceeds ANSI Spec A118.4

Recommendation:	Large Format Tiles, Porcelain Tile, Pavers, Natural Stone
Installation:	Interior and Exterior
Approved Substrate:	Exterior Grade Plywood, Cement Bed, Cement Board, Vinyl and Cutback Residue

Super-Lastic

Superior, polymer-modified, medium bed mortar with exceptional bond strength for heavy commercial applications. Fills in uneven surfaces, minimizing lippage between tiles.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A118.4

Recommendation:	Ceramic Tile, Porcelain Tile, Pavers, Natural Stone
Installation:	Interior and Exterior
Approved Substrate:	Exterior Grade Plywood, Cement Bed, Cement Board, Vinyl and Cutback Residue

Quik-Set

Polymer-modified, fast setting thinset mortar, ready to handle foot traffic within 3 hours.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A118.4

Recommendation:	Ceramic Tile, Porcelain Tile, Pavers, Natural Stone
Installation:	Interior and Exterior
Approved Substrate:	Exterior Grade Plywood, Cement Bed, Cement Board,

Glass Master

Polymer-modified, unsanded thinset for glass tiles and mosaics.

- For Wall Only
- Meets or Exceeds ANSI Spec A118.4

Recommendation:	Glass Tile Only
Installation:	Interior and Exterior
Approved Substrate:	Exterior Grade Plywood, Cement Bed, Cement Board

Marble Master

Polymer-modified, unsanded thin and medium bed mortar. Very smooth and non-staining for marble and natural stone.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A118.4
- NOT FOR USE WITH GREEN MARBLE

Recommendation:	Natural Stone
Installation:	Interior and Exterior
Approved Substrate:	Exterior Grade Plywood, Cement Bed, Cement Board

ADHESIVES

Our high-performance adhesives offer high bond strength and ease of use to a variety of flooring products and installation needs. Our ceramic Type I adhesives are formulated with non-sag properties and large tile installation capability.

Dual Purpose

High performance, Type I ceramic tile adhesive.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A136.1

Recommendation:	Ceramic Tile, Porcelain Tile
Installation:	Interior Only
Approved Substrate:	Cement Bed, Cement Board, Exterior Grade Plywood (interior floors only)

Platinum Dual Purpose

Premium Type I, ceramic tile adhesive, extra smooth formula with higher bond strength.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A136.1

Recommendation:	Ceramic Tile, Porcelain Tile
Installation:	Interior Only
Approved Substrate:	Cement Bed, Cement Board, Exterior Grade Plywood (interior floors only)

20x20 Premixed Thinset

Ready-to-use premium adhesive handles and adheres like thinset. Super strong, non-sagging and non-slip. No mixing, no mess! Great for winter-time installs.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A136.1

Recommendation:	Large Format Tiles, Porcelain Tile, Pavers, Natural Stone
Installation:	Interior and Exterior
Approved Substrate:	Exterior Grade Plywood, Cement Bed, Cement Board

Clear Set

Latex-based vinyl composition tile adhesive for residential and commercial applications.

- For Floor Only
- Meets or Exceeds ANSI Spec A136.1

Recommendation:	Vinyl Tiles
Installation:	Interior Only
Approved Substrate:	Exterior Grade Plywood, Cement Bed, Cement Board, Vinyl and Cutback Residue

ADDITIVES

Our latex admixtures enhance the performance of Super-Tek mortars and grouts by allowing the final mix to meet higher ANSI standards that are attained when mixing with water alone. Super-Tek's additives contain very low VOCs.

Acrylic Grout Additive

When mixed with Unmodified Portland cement grout in place of water, Acrylic Grout additive enhances the grout to exceed ANSI A118.7 standards for a polymer modified grout.

- Improves color uniformity and retention
- Enhances stain resistance
- Enables freeze-thaw resistance
- Increases grout bond to tile and substrate

Installation: Interior and Exterior Use

Super-Tiler

When mixed with unmodified thinset, meets ANSI A118.4 standards.

- Increased cement bond strength and flexibility
- Allows thinset to be used over plywood subfloors
- Enables freeze-thaw resistance

Installation: Interior and Exterior Use

GROUTS & CAULK

Our high performance Portland cement grouts are mold, mildew and water-resistant, and dry to a smooth, hard, durable finish. Beautify your tile installation with Super-Tek's 36 classic and designer colors.

Polymer Modified Grout

Premium polymer-modified grout that cures to an extremely durable finish with superior color consistency combined with increased stain resistance. Great for everything from residential to heavy commercial applications.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A118.7

Recommendation:	Ceramic Tile, Porcelain Tile, Pavers, Natural Stone
Installation:	Interior and Exterior
Available In:	Sanded (for joints 1/8" to 1/2") Unsanded (for joints up to 1/8")

Unmodified Grout

Portland cement grout for residential and commercial applications.

- For Floor and Wall
- Meets or Exceeds ANSI Spec A118.6

Recommendation:	Ceramic Tile, Porcelain Tile, Pavers, Natural Stone
Installation:	Interior Only
Available In:	Sanded (for joints 1/8" to 1/2") Unsanded (for joints up to 1/8")

Grout Stain

A water-based acrylic coating designed for restoring or changing the color of existing grout joints. Grout Stain also seals and protects joints from dirt, stains, wear, and abrasion.

- High performance sealer extends grout joint life
- Reduces daily maintenance
- Safe, non-hazardous, and nearly odorless
- Colors to match all Super-Tek 36 grout colors

Perfect Seal Caulk

A durable and fast curing siliconized acrylic caulking compound formulated to match Super-Tek's 36 grout colors. Non-sag formula allows for use on vertical installations.

- Creates a flexible water tight bond around sinks, tubs, shower doors and windows
- Moisture, mildew and UV resistant
- Interior/Exterior Use
- Colors to match all Super-Tek's grouts (see grout color chart)

SURFACE PREP

Proper surface preparation is key to a successful tile or stone installation. Our surface prep products are designed to easily repair and level floor surfaces prior to installing floor covering and to improve bond strength of substrates. Ideal for applications in institutional, commercial and hospitality environments as well as residential installations.

Super-Level

A premium grade, self-leveling Portland cement underlayment used prior to installing ceramic tile, natural stone, resilient flooring, carpet and glue-down wood flooring.

- Flowable cement produces a smooth, level floor from feather edge to 2" thick
- Install moisture-sensitive ceramic tile over freshly poured Super-Level in as little as 5 hours and other "soft good" flooring materials in 12-24 hours
- High compressive strength: >5500 psi (28 Days)
- Heal Time: 15 minutes
- Meets or Exceeds ANSI Spec A136.1

Installation: Interior Only

Super-Weld

Liquid primer enhances adhesion of Portland cement and gypsum patching compounds, plasters, and stucco mixes to a variety of substrates.

- Improves bonding of underlayment to substrates
- Brush or roll-on application

Recommendation:

**For substrate preparation
prior to application of
Super-Tek's Super-Level
self-leveling underlayment**

Installation: Interior Only

CARE & MAINTENANCE

High quality finishing and care products include sealers for coating and protecting tile and marble polish for rejuvenating and maintaining natural stone beauty. Excellent for both commercial and residential installations.

Grout & Tile Sealer

A VOC compliant, solvent-based formula designed for deep penetration on grout, porous stone, masonry and concrete. Grout & Tile Sealer protects against oil and water-based stains while allowing the surface to breathe. The 15 oz. inverted “any way valve” aerosol can allows easy application to both walls and floors from a standing position.

- Fast-drying, cures in 24 hours
- Can be applied immediately after grouting
- Provides UV and antimicrobial protection
- No need to wipe overspray from tile surface
- Indoor or outdoor use
- Long-lasting, 20-year protection

Natural Stone Color Enhancer

A penetrating sealer that protects against oil- and water-based stains on porous stone. VOC compliant, solvent-based formula intensifies the color and depth of the stone in just one coat. Not recommended for use on highly polished, ceramic/glazed or non-porous surfaces.

- Cures in 24 hours
- Use on porous stone such as slate, flagstone and sandstone, and on grout, concrete or masonry
- Enhance and seal in one step
- Easy spray-on or brush-on application

Granite and Marble Cleaner & Polish

Cleans and polishes all sealed natural stone surfaces in one easy step. A no-mess, penetrating foam formula removes grease, oil, dirt, fingerprints, smudges and streaks. Ideal for granite and marble countertops, tabletops, mantels, sinks and more.

- Easy spray-on application
- Residue free
- Resists fingerprints and smudges
- VOC compliant
- Water-based formula
