

OSHA's Crystalline Silica Compliance Self-Assessment

Take this brief self-assessment to help determine your readiness for OSHA's new Silica Compliance standards that take effect on September 23, 2017

Has your company implemented the following requirements?	
<input type="checkbox"/>	Identify a competent "go-to" silica compliance person for your organization
<input type="checkbox"/>	Understand all your Silica Generating Activities
<input type="checkbox"/>	Implement New Engineering controls such as water, vacuum attachments, dust collectors, and ventilation to prevent silica exposure
<input type="checkbox"/>	Develop a Written Exposure Control Plan document for potential exposure tasks
<input type="checkbox"/>	Train workers on silica risks and how to limit exposures
<input type="checkbox"/>	Provide respirators when engineering controls aren't adequate
<input type="checkbox"/>	Identify, mark and limit worker access to high exposure areas
<input type="checkbox"/>	Provide medical exams to highly exposed workers
