NO SAFETY
It was 1948 when Jorge was born.
He had two sisters and one brother. He was the smallest.
He had always take them to the park.
In the 1950s, cars such as the Ford Mustang were not made. When they would go to the park, all the children would be free to do what they pleased.
One day when they were headed to the park, a car hit them and Jorge went out the window.
That day was the worst day for Jorge and his family. Jorge did not survive the crash.
The End

Now car seats are made. That would have saved Jorge's life.
