**OUR APPROACH**

**Preliminary Data Analysis:**
- TCAA will collaborate with your staff to review hospital accounts for facility services to include the medical record, UB-04/institutional claims, itemized statements and payer remittances.

**On-Site Visit:**
- Review current billing strategies and processes with physicians, clinical staff and finance personnel, based on preliminary findings.
- Evaluate trauma specific coding for completeness & compliance and review the accuracy of activation fee charges.
- Meet with leadership to provide an executive summary of findings.

**Presentation of Action Plan:**
- Based on the assessment, we will present you with a detailed report that will include personalized, actionable solutions and recommendations to increase efficiency and maximize profitability.

“The TCAA Trauma Finance Consult Visit was a valuable program that allowed us to bring in experts in the field of trauma billing to help our team better understand ways to capture billing opportunities we were missing out on. I highly recommend this opportunity for any new program trying to find their way in trauma billing or an established program wanting to validate or improve their billing processes.” ~ P.A.

“We are very grateful for the consultation and recommendations. The visit was efficient and thorough and we came away with some very practical recommendations that will make a huge impact to our trauma program.” ~ E.M.

“The consultation visit was a great return on investment for our facility. The TCAA staff was friendly and made it easy for our staff to ask questions. TCAA provided feedback as well as citations to support the recommendations. I would recommend this service to any of my colleagues.” ~ J.B.
