

One of our 2019 fellow's chapters is on trauma systems. She is requesting the current status of trauma systems before completing her chapter. A total of 73 centers participated in the survey.

1. Is your facility independently owned or part of a system?

■ Independent
■ Part of a hospital system/network

2. Table: How many different trauma levels are in your system?

	Level I	Level II	Level III	Level IV	Level V
Min	0	0	0	0	0
Max	7	5	9	15	3
Average	1.4	1.8	2.6	2.6	0.3

1. Is your facility independently owned or part of a system? N=73. Majority (60%) of the surveyed centers are part of a hospital system/network. It was noted five hospitals from the same system participated in this survey, when appropriate their responses were condensed into one.

2. Table: How many different trauma levels are in your system? N=39. It is noted, several centers reported out having a level I or Level II pediatric center in their system as well as several non-trauma centers.

3. Is there a Trauma Medical Director (TMD) over your hospital system? N=39. Over half (74%) of the surveyed centers don't have a TMD over their hospital system.

4. Is there a regional trauma nurse director in your system? N=39. 79% of surveyed centers don't have a regional trauma nurse director in their system. The facilities that do have this position reported they oversee an average of 6 centers with a range of 2-17 trauma and non-trauma centers.

3. Is there a Trauma Medical Director (TMD) over your hospital system?

■ Yes ■ No

4. Is there a regional trauma nurse director in your system?

■ Yes ■ No

5. Is there a trauma service line vice president for your system?

■ Yes ■ No

6. Do trauma program managers cover more than one facility?

■ Yes ■ No

7. Does your system hold system-wide or regional trauma meetings?

■ Yes ■ No

5. Is there a trauma service line vice president for your system? N=39. Only 18% of surveyed centers have this position. The facilities that do have this position reported overseeing an average of 6 centers with a range of 1-14. One system reported being over 100 trauma and non-trauma centers.

6. Do trauma program managers cover more than one facility? N=39. Only 8% of surveyed centers have a trauma program manager covering more than one facility. Other responses regarding the number of centers they are overseeing include: 2 cover 2 level IV's and 1 covers 5 level IV's; 1 covers 2 level IV's; One of them does cover two facilities and the rest are individual.

7. Does your system hold system-wide or regional trauma meetings? N=39. A slight majority (59%) hold a system wide/regional meeting.
