SEXUAL ASSAULT EXAMINER CLINICAL SKILLS TRAININGS

Registered nurses, advanced practice nurses, physicians, and physician assistants are invited to attend this two day, hands-on clinical skills training. Participants will develop and enhance their clinical practice skills in the care of adult victims of sexual assault. This training will simulate the patient care setting and include hands-on activities, such as forensic photography of genital and non-genital trauma and mock patient assessments. Participants will have the opportunity to attain or maintain specific skills such as performing detailed oral and ano-genital assessments, speculum examination techniques, proper evidence collection, integrity, and maintaining chain of custody under the guidance of experienced preceptors.

Registration is free to health care providers from IHS, Tribal, and Urban Indian health care facilities. Health care providers from referral facilities that

serve American Indian or Alaska Native victims of sexual assault are also eligible to attend at no cost. Registrants **MUST** have previously completed a 40-hour Sexual Assault Examiner course. In some instances, this requirement may be waived upon request.

To register or get more information, please visit www.tribalforensichealthcare.org
