

2018 TSRC Peripheral Access Course: Development and Implementation for Hospital Respiratory Care Department Directors, Managers, and Educators

The Texas Medical Board and Respiratory Care Board have confirmed PICC line, Peripheral Line, and Venipuncture are included in the Respiratory Care Practitioner's Scope of Practice in Texas.

TSRC is offering a workshop describing the process used to successfully gain approval of Respiratory Care Practitioners' peripheral access teams into their hospital. The course is for Hospital Respiratory Care Departments only.

To be eligible to attend this workshop, the participant must meet the following requirements:

- Be a TSRC Member (sign up before registering if you aren't already)
- Be a Respiratory Therapy Hospital Department Director or Manager or Supervisor **or**
- Be an Educator of a Hospital Respiratory Care Department

There will be two RT Directors describing how they implemented the program in their hospital and how they overcame obstacles. The program sponsor will be describing the resources they have available to you during the implementation of the program in your hospital.

Space is limited to the first 50 to register.

Date: October 12, 2018

Time: 8:00am - 4:30pm - Registration begins at 7:30am

Approved 7 CEUs by TSRC

2018 TSRC Peripheral Access Training Course

The Texas Medical Board and Respiratory Care Board have confirmed PICC line, Peripheral Line, and Venipuncture are included in the Respiratory Care Practitioner's Scope of Practice in Texas.

To provide needed education for members working in critical care, the Texas Society for Respiratory Care (TSRC) will be offering a Peripheral Access Training Course.

Space is limited to the first 50 who meet the following criteria:

1. All attendees must be TSRC members. (May become a member when registering, if not already)
2. Attendees must work in critical care.

The conference will consist of lectures and rotation through five (5) stations of hands-on demonstrations.

Lectures:

1. Accountable for Vessel Health and Preservation
2. Ultrasound Essentials
3. Understanding Catheter to Vessel Ratios

Stations:

1. Compliance and Device Insertion
2. Needling with Ultrasound
3. RAPEVA Assessment
4. Device Considerations
5. Device Management
