A BITESIZE SERVICE.

**PREPARING YOUR BAR OR RESTAURANT FOR
RE-OPENING UNDER SOCIAL DISTANCING.**

INTRODUCTION.

We understand the challenges that many businesses face in coming out of the lockdown, not least because we don't yet know exactly what the detailed parameters for opening are going to be.

We recognize that in the short-term capital investment is not something many people are thinking about and that repairing balance sheets and preserving cash is likely to be most people's priority.

HERE TO HELP.

We know many businesses could benefit from **short term assistance in reconfiguring their restaurant spaces** to be acceptable to the social distancing expectations of the guest, whilst still retaining some sense of the ambience and personality of their once bustling, busy restaurant.

WHY PREPARATION IS KEY.

There is then the need to **control and manage** the flow of guests through the space in a way that makes them feel safe, that you are really looking after their best interests. **Bespoke messaging that reflects the values and personality of your brand** are what is really required here, they will have much more impact than a generic set of graphic messaging. Personalised messaging will tell your guests you really care about their welfare.

THINK
ABOUT
THINGS
DIFFERENTLY

WHAT WE ARE OFFERING.

So we are offering a simple **half day or full day consultancy service** at a **competitively priced rate** to visit a restaurant, **make recommendations**, and then have the various **items priced through our network of suppliers**, working as always to minimize the cash outlay and to ensure the restaurant can revert easily to its former layout and the short term measures can be **re-used or recycled**.
