All materials are appropriate for the region based on climate, geography, and probable available resources.	Most, but not all, materials are appropriate for the region based on climate and geography.	Some materials are appropriate for the region based on climate and/or geography.
Fits the budget	Costs less than \$100	Costs less than \$125	Costs less than \$150	Over \$150
Explanatory text	Includes all necessary information, and identifies a language appropriate to the region.	Includes all of the necessary information, but does not identify an appropriate language.	Includes some of the necessary information, but may be lacking key components. May or may not identify an appropriate language.	Lacking in key information components and does not identify an appropriate language.
Deployment plan	Describes the best mode of transportation, funding sources, organizations responsible for delivery, and distribution process.	Addresses three of these four elements adequately.	Addresses two of these four elements adequately.	Addresses one or fewer of these elements adequately.

3 Additional Items for zombies – Optional

Container design – Optional

Checklist:

- Location Description:
 - I have chosen a specific place/town so I have a location and population to work with
 - I have looked at several maps to determine the natural disasters in the area
 - I have explained what natural disasters happen in the area and why
- List of items included in kit
 - Each item has a price listed
 - All items are from a retailer and new
- Explanation sheet
 - Each item has an explanation of why/how each item is used to meet basic needs
 - Explanations are in full sentences
 - Items are divided up into what need they address
 - I explain how each item can be used in the different natural disasters that will happen in my area
 - This is a reference guide to the people receiving the sheet
 - Language to be printed is included
- Total cost is under \$100
- Implementation Plan
 - I have looked at the population of my area and developed an appropriate way to deliver the number of containers needed
 - I have clearly explained how the containers will be delivered
