

SP Mid-Atlantic Presents

Hidden Gems

In the Standard Process Product Line

How to Use Them to Get Famous Results

When: Saturday, March 16th, 2019

Time: 8:30 am – 5:00 pm (Salad Bar Lunch with Protein provided)

Where: South County Library

6303 Merriman Rd, Roanoke, VA 24018

Cost: \$95 Practitioners, \$69 for Staff

Presenter: Dr. J.S. Eggleston

8 CEU's for VA. DC's

Build a Better Foundation:

The 8 Standard Process products that can be used as a "MULTI". How to decide which one to use for efficient, targeted results, based on your patient's current health challenges. Hint: Catalyn isn't always the best choice for a foundational "multi-vitamin" product for your patients.

Jump-Start Stalled Progress:

We all have patients for whom a given nutritional protocol just isn't working. You'll learn how to use 3 Standard Process products to jump start these "protocol failures." The principles behind why these products work, and how to integrate one or more of them into your recommended protocol, will be explained in detail.

Un-Earth the Hidden Gems:

Besides these 11 products, you will learn how to use 24 other SP products that are "hidden gems". These are not the top-sellers in the SP line, and are very under-utilized in most practices. You will learn detailed information about their use, including what Dr. Lee had in mind when he formulated them.

Easy-to-Implement:

Simple, effective, easy to use nutritional protocols that you can easily blend with your current practice, ***no matter where you are on the nutrition learning curve.***

How Do I Use This in Practice?

How to use a couple of simple office forms as part of your intake paperwork so that you'll know exactly how to start a conversation about nutrition, how to keep track of changes, and how to nearly *guarantee* compliance with your protocols. (Forms included with class notes)

Dr. Eggleston is a native of Roanoke and went to The College of William and Mary, starting the week after Woodstock finished. He received an M.S. in theoretical mathematics from Syracuse University, plus a year toward Ph.D. but never finished that darn dissertation.

He graduated in 1989 from New York Chiropractic College and earned an M.S. in Human Nutrition from University of Bridgeport in 2010. One of his goals is to receive a Diplomate in nutrition from the ACBN in 2019. He is an adjunct faculty member of the Post-Graduate Education Department of Texas Chiropractic College and has lectured about SP and MediHerb products since 2012 to doctors across the Mid-Atlantic. He has also taught biochemistry at Averett University. He has four daughters and a son and has been in practice in Danville for 27 years after being an associate in Williamsburg. He was given permission to teach these workshops by his two cats, who told him "we're watching you!", whatever that means.
