Vaccinations Position Statement

**Passed September 24, 2016
General Membership Meeting
Hotel Roanoke
Roanoke, Virginia**

The Unified Virginia Chiropractic Association (UVCA) opposes mandated medical procedures of any kind against an individual's freedom to choose. The UVCA supports each individual's right to freedom of choice in his/her own health care. The UVCA also supports an individual's right to freedom of choice regarding his/her own family and children. Further, an individual's choice on this matter should be based on informed awareness of the proposed benefits and possible adverse effects of mandated medical procedures.
