

## Wine Grapes Available

Kamiak Vineyards, Inc. was established in 1980 and is the estate vineyard of the Gordon Estate brand. In the past, Gordon Estate has utilized all the fruit from the property. Recently Kamiak has been supplying fruit to a few select wineries and is now looking to expand that offering.

With plenty of grapes on the market, it is important to source your fruit from an experienced grower of a well-established vineyard. Careful selection of fruit is key to quality wine. Marc Nelson has been managing the vineyard since 2002. Kamiak is known to produce soft, yet well-structured wines that blend well with wines from regions which have higher alcohol and harsher tannins. The site is ideal for many varietals, allowing for adequate ripening yet enough hang time for proper balance.

Kamiak Vineyards is currently accepting long- and short-term contracts for wine grapes. We are able to machine harvest or hand-pick. We can provide any amount of processing if desired: de-stem, press, even full fermentation to bulk, all the way to bottling. We currently ship as far away as Chicago, so we know how to deliver your fruit in excellent condition, no matter how long the commute.
