NAFS 2011 —
North American Fenestration Standard/Specification for windows, doors, and skylights
Contents

Preface ix

0 Introduction 1
  0.1 General 1
  0.1.1 Applicability 1
  0.1.2 Sustainability 1
  0.1.3 Content 1
  0.2 Performance Classes and Grades 2
    0.2.1 General 2
    0.2.2 Guidance for the specifier/purchaser 6
    0.2.3 Performance Grade (PG) designations 6
    0.2.4 Positive and negative design pressure (DP) 7
    0.2.5 Water penetration resistance testing and performance 8
    0.2.6 Operation/cycling performance 9
  0.3 Short-form specification 9

1 Scope 10
  1.1 General 10
  1.2 Terminology 10
  1.3 Units of measurement 10

2 Reference publications 11

3 Definitions 22

4 General requirements 32
  4.1 General 32
  4.2 Gateway performance requirements 33
  4.3 Performance Grades (PG) 33
    4.3.1 Assignment of Performance Grade (PG) 33
    4.3.2 Optional Performance Grades (PG) 33
  4.4 Product designations 34
    4.4.1 General 34
    4.4.2 Primary designator 34
    4.4.3 Secondary designator 50
  4.5 Dual windows or dual doors 52
    4.5.1 General 52
    4.5.2 Requirements 52
  4.6 Mullions 53
    4.6.1 Mullion rating 53
    4.6.2 Composite units 58
    4.6.3 Combination assemblies 58
    4.6.4 Field mulling without manufacturer’s involvement 58
    4.6.5 Uniform load deflection 58
    4.6.6 Operational interference 59
    4.6.7 Vertical (dead load) deflection 59
  4.7 Mullion assembly performance 59
    4.7.1 Water testing 59
    4.7.2 Air leakage testing 59
  4.8 Mullion assembly primary designator 59
5 Class R and LC windows and sliding doors 60
5.1 Class R and LC requirements (specific to the U.S.) 60
5.1.1 General 60
5.1.2 Uniform load deflection test 63
5.2 Class R and LC requirements (specific to Canada) 63
5.2.1 General 63
5.2.2 Canadian (only) air infiltration/exfiltration 66
5.3 Requirements applicable to the U.S. and Canada 66
5.3.1 General 66
5.3.2 Test specimen installation 67
5.3.3 Uniform load deflection test 67
5.3.4 Alternative minimum test sizes and minimum Performance Grades (PG) for selected Class R products (optional) 67
5.3.5 Auxiliary/durability tests for Class R and LC windows 68
5.3.6 Safety drop test (non-hung vertical operating products only) 70
5.3.7 Unit dead load test (greenhouse windows only) 70

6 Side-hinged doors (all classes) 72
6.1 General 72
6.2 Side-hinged door requirements (specific to the U.S.) 72
6.3 Side-hinged door requirements (specific to Canada) 73
6.3.1 General 73
6.3.2 Canadian (only) air infiltration/exfiltration 74
6.3.3 Example 75
6.4 Requirements applicable to the U.S. and Canada 76
6.4.1 General 76
6.4.2 Gateway requirements 76
6.4.3 Test specimen installation 77
6.4.4 Limited water testing 77
6.4.5 Force-to-latch for side-hinged door systems 77
6.4.6 Uniform load deflection test 78
6.4.7 Operation cycling performance (side-hinged door systems only) 79
6.4.8 Vertical loading resistance (side-hinged door systems only) 79
6.4.9 Composite units and unique framing members 79

7 Class CW and AW windows and doors 81
7.1 Class CW and AW requirements (specific to the U.S.) 81
7.2 Class CW and AW requirements (specific to Canada) 83
7.2.1 General 83
7.2.2 Canadian (only) air infiltration/exfiltration 86
7.2.3 Example 86
7.3 Requirements applicable to the U.S. and Canada 87
7.3.1 Gateway requirements 87
7.3.2 Test specimen installation 87
7.3.3 Uniform load deflection test 88
7.3.4 Auxiliary/durability tests for Class CW and AW windows and doors 88
7.3.5 Life cycle testing (Class AW products only) 95
7.3.6 Operation/cycling-slam test performance (architectural terrace doors only) 95

8 Tubular daylighting devices, roof windows, and unit skylights 96
8.1 General 96
8.2 TDD, roof window, and unit skylight requirements (specific to the U.S.) 96
8.3 TDD, roof window, and unit skylight requirements (specific to Canada) 98
8.3.1 General 98
8.3.2 Canadian (only) air infiltration/exfiltration 99
8.3.3 Canadian (only) optional Performance Grades (PG) 100
8.4 TDD, roof window, and skylight requirements applicable to the U.S. and Canada 101
8.4.1 General 101
8.4.2 Example 2 102
8.4.3 Test specimen installation 102
8.4.4 Air leakage testing 104
8.4.5 Water penetration testing — Roof windows, TDDs, and unit skylights 104
8.4.6 Uniform load testing 104
8.4.7 Auxiliary tests for roof windows, unit skylights, and TDDs 104

9 General testing requirements 105
9.1 Testing sequence 105
9.1.1 Applicability 105
9.1.2 Details of testing sequence 105
9.1.3 Test specimens 105
9.2 Test specimen requirements 105
9.2.1 General 105
9.2.2 Composite units and combination assemblies 105
9.2.3 Alterations 106
9.2.4 Specimen size 106
9.2.5 Test specimen installation 106
9.3 Testing methods 108
9.3.1 Operating force 108
9.3.2 Air leakage resistance test 109
9.3.3 Water penetration resistance test 110
9.3.4 Uniform load tests 111
9.3.5 Forced-entry resistance test 112
9.3.6 Auxiliary (durability) tests 112
9.4 Optional tests 122
9.4.1 Condensation resistance 122
9.4.2 Thermal transmittance 122
9.4.3 Acoustical performance 123
9.4.4 Impact performance 123
9.5 Laboratory test report 124
9.5.1 Summary data 124
9.5.2 Detailed data 124

10 Material requirements 126
10.1 Material tolerance 126
10.2 Glazing and glass 126
10.2.1 Reference Standards 126
10.2.2 General requirements 126
10.2.3 Glass selection 126
10.2.4 Multiple glazing panels (MGP's) 130
10.2.5 Plastic glazing 131
10.3 Framing/cladding materials 132
10.3.1 General 132
10.3.2 Wood 132
10.3.3 Wood flush and molded fiber doors 133
10.3.4 Vinyl 133
10.3.5 Cellular PVC 134
10.3.6 Aluminum 134
10.3.7 Fiberglass 135
10.3.8 Steel materials and coatings 136
10.3.9 Cellulosic composite materials 136
10.3.10 Fiber-reinforced PVC 136
10.3.11 Acrylonitrile-butadiene-styrene (ABS) 137
10.3.12 Doorlite insert frame materials 137
10.3.13 Other materials 137

11 Component requirements 138
11.1 General 138
11.2 Hardware 138
11.2.1 Testing 138
11.2.2 Window opening control devices and window fall prevention devices 139
11.2.3 Hung window hardware 140
11.2.4 Casement, awning, hopper, and projected window hardware 140
11.2.5 Parallel opening window hardware 140
11.2.6 Door hardware 140
11.2.7 Hinged window hardware 141
11.2.8 Tropical window hardware 141
11.2.9 Dual-action window hardware 141
11.3 Fasteners 141
11.4 Reinforcing 142
11.5 Weatherstrip and/or weatherseal for non-static joints 142
11.6 Insect screens 143
11.7 Sealants 143
11.8 Coatings and finishes 143
11.9 Integral ventilating systems/devices 144
11.10 Blinds in dual-glazed products 144
11.11 Setting blocks 144

12 Fenestration type and test size requirements 145
12.1 General 145
12.2 Product dimensions and tolerances 145
12.2.1 Dimensions 145
12.2.2 Tolerances 147
12.3 Qualification of designs, configurations, and assemblies 147
12.3.1 General 147
12.3.2 Geometry and components 147
12.3.3 Operation and orientation 148
12.3.4 Dividers (muntins) 148
12.3.5 Qualifying unequal lite assemblies 148
12.3.6 Composite units and unique framing members 149
12.4 Specialty products, basement windows, hinged windows, side lites, transoms, and secondary storm products 154
12.4.1 Specialty products 154
12.4.2 Basement windows 154
12.4.3 Hinged windows 154
12.4.4 Side lites, fixed doors, and door transoms 154
12.4.5 Secondary storm products 154
