Women in Investing – Discovering the Skills You Have

Today, more women than ever are responsible for their financial well-being, and the well-being of their families. But women often face unique financial challenges. That's why it's so important that no matter what life stage they're in, women know how to save, invest, and plan for their future

Join us for an interview with **Lauren Rich Fine, CFA, Partner** from **Gries Financial Partners** who will share her expertise on the following:

- Why women's economic clout is growing
- The unique financial challenges women face, such as longer life expectancies (women are likely to be single for the last third of their lives), more career breaks for caregiving, and how they impact long-term financial security
- Steps women can take to help them achieve financial security, including taking control of their money, becoming more knowledgeable investors, advocating for themselves in the workplace, planning for retirement, protecting their income and assets, and creating an estate plan.
- Take the time to invest in the best investment—yourself. This session provides a convenient way to learn in a welcoming and fun atmosphere with other women who are in the same position.

Registration closes at midnight on May 16th! Late fees apply after registration closes. Contact Mindy Koenig at mkoenig@weldoh.org if you have questions.
