LAUNCHING AUGUST 2020
MICRO-COMMUNITIES

DIGITAL HEALTH
For professionals who are/have worked in companies leveraging digital health technologies, including digital medicine, digital therapeutics and digital monitoring/remote sensing, and exploring their role in wellness, lowering of healthcare cost, and transforming care delivery.

MEDICAL DEVICE & DIAGNOSTICS
For professionals who are/have worked in medical device or diagnostic companies who are interested in expanding their network, sharing best practices and excelling in their profession.

SOCIAL IMPACT
For professionals interested in learning more about social impact business systems applied within the life sciences context, interested in discussing and applying these philosophies in practice.

GENOMICS
For professionals who are/have worked in companies exploring the human genome or are interested in genomics impact on the human health including genome-focused innovations, diagnostics, and research.

MICROBIOME
For professionals who are/have worked in companies exploring the human microbiome and its role in physiology, health, and disease, including microbiome-focused interventions, diagnostics, and technologies.
