He spends a year employing a hands-on approach trying every popular celebrity beauty routine and diet. He reads all the celebrity magazines, Twitter feeds, and gossip blogs – he even signs himself up with a modeling agency! In the end, he uses science to debunk many of the myths and promises espoused by today’s celebrities, separating sense from nonsense…

Sexual assault and physical violence against women are as old as time itself. In today’s technological world, sexual assault and female trafficking are more pervasive and organized. P.O.W.E.R. 2016 will link scientific innovation, law, and economic growth in a cross-sectional forum of experts, entrepreneurs, and researchers who have developed key tools for fighting violators. **Five successful Pittsburgh innovators** will highlight cutting-edge technologies used to combat, prevent and prosecute sexual brutality in Pittsburgh and across the globe:

During the event we will enjoy a boxed lunch while two financial advisors, Amy Johnston and Elizabeth Pritchett from Morgan Stanley, explain the basics of personal finance and saving for retirement to us. They will also educate us about the importance of creating a financial plan, and how to get started with the financial planning process.
