Dear friends,

As we roll into the cooler months for those of us north of the equator, we trust you are well and staying on top of your own wellness through whatever means necessary. At the WPC 2019 we included a Table Tennis room in the Wellness Way area for the first time and saw more than 100 delegates who chose to use it! It was a resounding success and we are proud to share the news and support the effort. The WPC offers the most unique opportunity for novel research, presentations, and network building in the field of Parkinson's Disease.

In the last newsletter, we announced the first ever WPC tournament and we are happy to report that the Parky the Raccoon Table Tennis tournament was a huge success. As we roll into the warmer months for those who live south of the equator, we trust you will enjoy the break.

In the last newsletter, we announced the first ever WPC tournament and we are happy to report that the Parky the Raccoon Table Tennis tournament was a huge success. As we roll into the warmer months for those who live south of the equator, we trust you will enjoy the break.

Parky the Raccoon was born in the summer of 2012 when Bob Kuhn, an ambassador for the 3rd World Parkinson Congress and person with Parkinson's Disease, was curious about this unique little animal, indigenous to North America, that is often kept as a pet. Parky the Raccoon has become a huge hit, even coming to life as the WPC mascot. Parky now resides with humans all over the world.

You may not realize this, but our little raccoon makes a huge impact. One hundred percent of the profits from the sale of each Parky the Raccoon are donated to the WPC. What the WPC offers is the most unique opportunity for novel research, presentations, and network building in the field of Parkinson's Disease.

We are looking for more WPC stories, to better understand how the WPC can be helpful to you as you continue to learn about Parkinson's Disease. If you have a story you would like to share, please email us at info@worldparkinson.org.

We have included 3 new stories from this newsletter, and we may order yours.

Tell us your story
