

Presented to to an organization whose technology has contributed to the business and operational success of teleports through lower costs, increased efficiency, new capabilities or access to new markets.

WTA will crowdsource the selection of the Teleport Technology of the Year. We will post your nomination information online and invite the primary representative of WTA-member companies to vote in order to select our winner. The questions below ask you for information for your public listing and your answers will be reproduced in your listing exactly as they appear here. See the Sample Listing at the end of the questionnaire for an example.

Please fill in the fields below, which will expand as required. Save the file to your computer and email to WTA at [rbarney@worldteleport.org](mailto:rbarney@worldteleport.org). You may also print a copy and submit by fax to +1 212-825-0075. **Deadline for nominations: April 30, 2021.**

## Description of Company

### SAMPLE LISTING

#### **HTS Accelerator**

HTS Accelerator from ABC TechCo is a suite of advanced solutions for the high-performance management of high-throughput satellite networks. Developing in full compliance with existing standards, it represents a step change in end-to-end network visibility and performance optimization for teleport and satellite operators as well as end-users.

#### **Value to the Customer**

HTS Accelerator replaces multiple hardware and software solutions with a single, low-power user interface and rack units at the hub and remotes. While reducing capital requirements, it delivers a new level of power and flexibility in application design as well as visibility of service quality and the ability to customize service levels on the fly.

#### **References**

HTS has been implemented by leading-edge HTS satellite operators deploying service into North American and European markets since 2013, and is experiencing strong user adoption in the defense, energy and broadcast contribution markets.

#### **About the Company**

HTS Accelerator is the newest product line from ABC Techco, a provider of advanced solutions for the design and management of high-performance satellite and hybrid networks.
