The online Broadband Academy offers courses for your “new to the field” employees and CSR’s, Installers and Technicians, and Network Specialists.

Read what a few Broadband Academy students have to say about the Level 1 classes.

“I found the Fiber Service 101 course to be beneficial as I learned what the fiber consists of as well as the whole process of how it is brought into the home. There were some challenging modules. All of the instructors were awesome and very helpful whenever I reached out to them ... thank you! Overall, it was a great course.”

(Fiber 101 student)

“This was a good informational class with some rather high expectations. The videos in Module 2 were very informative and I now have a much better understanding of cabling and outside plant. The video by Wisc-Online was a great tool to understand the connection from CO to NID.”

(Telco Services 101 student)

Upcoming Events:

August 18-19: Paul Kostner presenting at the NTCA Conference

August 24: Last day to register for online classes

August 26: Fall semester begins

October 21-23: The Broadband Academy will have a booth at the [WSTA Fall Conference](#)
