

Pigeon Plum

Coccoloba diversifolia

Description: A wonderful small to medium-sized tree, typically sporting a multiple trunk. Produces small, whitish-green flowers in early summer, followed by purple, pear-shaped fruit.

Height: Typically 30-40 feet.

Light: Full sun; can tolerate partial shade.

Drought Tolerance: Moderate.

Wildlife and Ecology: Provides a significant food and cover for wildlife. Nectar plant for several types of butterflies. Birds and other animals eat the fruits.
