WellSpan Health, as a system, has determined that the flu vaccine administered for the 2016 flu season will be the quadrivalent product which is designed to protect against four different strains of the flu. This quadrivalent product is costlier than the trivalent product which is often utilized by competitors and only covers three strains of the flu virus. WellSpan Health's Immunization Committee has made this recommendation in accordance with the research, stating that "by including an additional B strain in its composition, the quadrivalent product increases the likelihood that it will cover the circulating B strain for that season, offering better protection" against the flu.

AND PLEASE REMEMBER:

- 1. Checks should be made payable to "YCBA".**
- 2. Wear clothing that allows access to your arm!**
- 3. Recipients must be over 16 years of age.**
